

HELP SHAPE BETTER CARE FOR MINORITISED ETHNIC PEOPLE WITH MULTIPLE LONG-TERM CONDITIONS

KING'S
College
LONDON

More people are living with multiple long-term health conditions than ever before, and these conditions unevenly affect minoritised ethnic communities. Researchers at King's College London are running a study to understand the care journeys of people from such backgrounds.

We want to learn about your experiences living with and managing two or more long-term conditions, and how you experience support.

You can participate if you:

- ☐ Are 45 years old or above
- ☐ Live in Coventry, London or Manchester
- ☐ Have 2+ long-term mental or physical conditions (e.g. diabetes, hypertension, asthma, arthritis)
- ☐ Are from a minoritised ethnic group (e.g. Black, Asian, Arab, mixed ethnicity)
- ☐ Can speak English sufficiently for an interview

The interview will take 60–90 minutes at a time and place that suits you. We will explore your experiences, what you need, what works well, and what could be better. As a thank you for your time, you'll receive a £25 voucher after the interview.

To learn more about the study and to participate, scan the QR code, or visit this link: <https://forms.office.com/e/HxZ3bEXeRz>

Your experiences matter. By sharing your story, you'll help us improve care for people in similar situations. If you have questions, please contact the research team, Dr Brenda Hayanga and Dr Sujith Prankumar, at interception@kcl.ac.uk.

This study has been reviewed by and received ethics approval via the Social Science & Public Policy, Humanities Research Ethics Sub-Committee, King's College London (HR/RGO-24/25-46816). If you would like to complain about any aspect of the study, please contact The Chair, Social Science & Public Policy, Humanities Research Ethics Sub-Committee, rec@kcl.ac.uk
